

UB-DEODOPLUS

Water conditioner for reducing ammonia, H₂S & other obnoxious gases

UB- DEODOPLUS is a unique water conditioner that has been scientifically formulated to remove obnoxious gases & detoxify the pond. It is a combination of Yucca plant extract, Bacillus subtilis fermentation extract, silicates, enzymes & natural bacterial growth stimulants. Yucca schidigera acts as a preconditioning agent because of its ability to lower ($P < 0.05$) ammonia & nitrite levels. It inhibits the enzyme urease from forming ammonia. It binds obnoxious gases & thus reduces the odor in the pond. The sarsaponin of Yucca accelerates the breakdown of organic waste by directly influencing the development of bacteria that are vital to the waste disposal.

COMPOSITION

Yucca plant extract, *Bacillus subtilis* fermentation extract, silicates, enzymes & natural bacterial growth stimulants.

MODE OF APPLICATION

Mix either with Zeolite or 5 liters of water & spread uniformly over the pond or as recommend by an aquaculture consultant.

BENEFITS

- Reduces or eliminates toxic ammonia Reduces off flavor problems
- Degrades organic waste and stimulates the growth of beneficial bacteria
- Increases survival rate, improves yield and feed conversion
- Reduces the need for frequent water changes by controlling pollution Promotes a healthy aquatic environment.
- Reduces mortality rates.

STORAGE

Store in a cool & dry place.

SHELF LIFE

Best before 24 months from the date of manufacture.

DOSAGE

- Prevention : 100 gms /acre (or) 250 gms/hectare pond for every 15days.
- Treatment: 1 Kg/hectare in 2 days in a row (or) as advised by an aquaculture consultant.

PRESENTATION

500 gms & 1 Kg

Plot No.2, Phase II, M.N. Park, Genome valley, Kolthur village, Shameerpet Mandal, Medchal Malkajgiri Dist, Hyderabad - 500078, Telangana.
