

# UB-PROBIZYME®

*An enzymatic immunizer probiotic for shrimp, prawn and fish*

**Composition :** UB-PROBIZYME is a unique blend of Probiotics, Enzyme complex, Vitamins and Herbal mineral complex in bio-available form

**Benefits :**

- *Saccharomyces cerevisiae* (SC-47) helps in optimum feed utilization by increasing availability of minerals, utilization of feed nutrients, protein
- Phytase enzyme enhances bioavailability of macro and micro minerals in fish and also to reduce the non- available phosphorous pollution into the aquatic environment.
- Controls loose shell problem by providing available phosphorous.
- The enzymatic complex increases digestive capacity of Shrimp, Prawn and Fish. Suppresses the anti-nutritional factors in feed and increases the nutritive value of the feed
- Herbal mineral complex is a unique natural growth promoter and acts as a central nervous system stimulant.
- Spirulina and seaweed extract: Ensures better growth rate and increased survival rate.
- Improves taste, texture and colouring of shrimp, prawn and fish
- Vitamins supplement provide for normal growth and maintenance of Shrimp, Prawn and Fish.

**Dosage :** Prawn & Shrimp: 5 gm / Kg feed
